SKILLS

Languages
C#, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks
.NET Core, ASP.NET Web API, React, React Native, Redux, RTK, Node.js, Express.js

Databases
SQL Server (T-SQL, indexing & query optimization)

Cloud & DevOps
Azure DevOps (CI/CD, TFVC), AWS, Firebase

Security
JWT, RBAC, MFA, password policy & expiration

Payments
Stripe integration, RESTful API design

AI Tools
Claude Code, Claude Cowork, Cursor

Dev Tools
Git, GitHub, TFS, Visual Studio, VS Code, SSMS

CERTIFICATIONS

- Full Stack Web Development in .NET Core and SQL Server
- Hybrid Mobile Application Development using React Native CLI

EDUCATION

B.Tech, Information Technology
Ajay Kumar Garg Engineering College, Ghaziabad

Intermediate
Kendriya Vidyalaya No. 2 OCF, Shahjahanpur

High School
Kendriya Vidyalaya No. 2 OCF, Shahjahanpur

Full Stack Software Engineer with **3.5+ years** of experience designing and delivering scalable web and mobile applications using .NET Core, SQL Server, React, and React Native. Proven track record building secure REST APIs, integrating third-party payment systems, and implementing role-based authentication and authorization. Experienced in cloud deployments (Azure DevOps, AWS, Firebase) and modern AI-assisted development workflows (Claude Code, Claude Cowork, Cursor). Seeking a Senior Software Engineer role to drive full-stack architecture and delivery.

WORK EXPERIENCE

Software Engineer L1 — Invia Private Limited
Sep 2025 – Present
Noida, India

- Architect and deliver scalable full-stack applications for telecom and financial services clients using React Native and .NET Core, spanning both B2B and B2C platforms.
- Engineer role-based authentication and authorization, including multi-factor authentication (MFA) and password expiration policies, for internal proof-of-concept portals built in .NET Core.
- Integrate Stripe payment processing into a telecom plan-management application, enabling secure plan purchases and service payments.
- Optimize SQL Server queries and indexing strategies, reducing API response times.

Associate Software Engineer — Invia Private Limited
Nov 2023 – Sep 2025
Noida, India

- Engineered and maintained modular, secure REST APIs supporting loyalty programs, recharge workflows, and JWT-based authentication.
- Deployed and managed builds through Azure DevOps (CI/CD) using TFVC version control.
- Launched scratch card and referral logic within user wallets, increasing user engagement by 25%.

Trainee Software Engineer — Invia Learning Center
Aug 2023 – Nov 2023
Noida, India

- Delivered production-grade features using React Native, .NET Core, and SQL Server.
- Developed reusable React Native functional components, including social feed UI and navigation logic using React Navigation Stack.
- Consumed RESTful APIs and rendered dynamic data using the Fetch API; applied React Hooks (useState, useEffect) to manage component lifecycle and side effects.

KEY PROJECTS

Blaze Mobile — Australian Telco Plan & Service Management App

- Engineered a full-stack telecom mobile application, Blaze Mobile, for the Australian telco market, enabling customers to browse and purchase mobile/data plans, manage active telco services, and view usage.
- Integrated Stripe for secure payment processing, covering plan purchases, renewals, and billing workflows.
- Developed backend services in .NET Core with SQL Server, and a responsive React front end for telco plan and service management.

App Store: https://apps.apple.com/au/app/blazemobile/id6779590367

Play Store: https://play.google.com/store/apps/details?id=com.blazemobile

Optus Price Estimation Portal — Role-Based Authentication & Authorization (.NET Core)

- Designed and built the Optus Price Estimation Portal in .NET Core, showcasing enterprise-grade identity and access management.
- Implemented role-based authentication and authorization (RBAC), multi-factor authentication (MFA), and password policies including expiration and complexity rules.
- Established secure login and session management flows aligned with common enterprise security standards.

Project URL: https://dev-priceestimationportal.invia2.com.au

Watchio — Watch & Earn Web Application

- Developed a full-fledged web application enabling users to watch content and earn in-app currency, with separate admin and user modules.

Socially — Social Media Mobile App

- Created a social media app in React Native with reusable components (header, search, card, list) to manage the UI efficiently.
- Implemented state management for user interactions such as liking, sharing, and commenting, using Redux Toolkit (RTK) for API calls and state handling.
